Wizard Industries Shooting Specs

If you've noticed yourself holding items a little farther away from your eyes than you once did in an effort to focus, you'll rejoice at Wizard Industries Shooting Specs. They're a new concept in safety eyewear for the 30-something-plus crowd. Shooting Specs are mono-lens bifocals that help combat presbyopia—the inability to focus at close distances. Look up and the view is clear. Look down and you can enjoy corrections of +1.0, +1.5, +2, +2.5 and +3 diopter strengths. The safety-compliant glasses feature polycarbonate lenses and integrated side shields

and provide 99.9-percent UV protection. Contact Wizard Industries, Dept. WO, 15500 Erwin Street Van Nuys, CA 91411; (888) 346-3826; www.wizind.com.
